

PROFILE

Santa Barbara, located about two hours north of Los Angeles, is widely considered to be one of the most dynamic winemaking regions in California today, and David Potter is one of the new guard making a name for himself here. Nowadays, Potter's most recent creation, places a focus on the surprise, mystery, and weirdness that wine can bring to the world. This is wine as it was made in antiquity and should be made from now on. The future is unfiltered and chemical-free. Nowadays wines are cloudy, and funky, full of mystical life forces and radiant energies with high vibrations.
